

Christel Nani Kenya Safari

June 17-24, 2021. \$3867.00 pp/double occupancy. Full board.

Listen to the call of your spirit to Magical Kenya for Energy classes, fun, service work and tribal gatherings in the mara

We share the memories of once in a lifetime.

DID YOU KNOW...

- **Elephants can heal your heart chakra.**
- **Cheetahs have a unique energy signature.**
- **Hyenas got a bad rap.**

Adventure calls! The song of Kenya is in our hearts, and we are ready to continue our work in the Mara. We will study energy medicine and animal energy with Christel. **Please download the extreme health and safety protocols in place for your safari.**

Plan to flight out of the USA on June 17th, and your adventure begins on the 18th as you are greeted at the Nairobi Airport and transported to a safe and quiet Nairobi hotel. We will share breakfast together on the 19th, and then be transported 40 minutes to Wilson Airport for our internal flight to the Mara. Expect a warm Maasai welcome as we gather our

belongings for the first of many game drives on the way to our camp.

We've seen live births, and thousands of wildebeest stampede a river crossing. Each visit is unique and awe-inspiring.

We will spend a day at our school in Mara Rianta to greet the children and headmaster and teachers, excited to share the next phase of our community building.

No vaccines are required, and as always, this decision is a personal one. Should you wish to take the same flights as others, let us know.

Wifi, Indoor hot showers and bathroom, comfy bedding, camp security, bottled water, private chef for our dining tent, private guide in open air trucks, and of course, Christel with you every step of the way.

The Olare Motorogi Conservancy is prime private wilderness in southwest Kenya which forms part of the Maasai Mara-Serengeti ecosystem and wildlife dispersal zone. The conservancy lies immediately to the northwest of the main Maasai Mara Reserve. Tourism is limited to a maximum of 94 beds which maximizes the client wilderness experience and minimizes the environmental impact of tourism. Open hills provide a habitat for a diverse range of grazers, including giraffes, zebras, hartebeests, and warthogs. These herds attract large numbers of predators, including lions, cheetahs, hyenas, and jackals. In between the hills run a number of small seasonal streams, fringed by stretches of forest which are home to a broader range of species including baboons, elephants, buffaloes, hippos, and leopards.
